

TUFF

Silicon Manganese (SiMn)
Premium Product of
City Cat Overseas Chemicals Ltd (CCOCL)

ISO 9001:2015, ISO 14001:2015 & 18001:2007
CERTIFIED COMPANY

Manufacturer of "TUFF" Silicon Manganese
Transforming Steel with "TUFF" Silico Manganese.

GLOBAL PROVIDER

Your Trusted Manufacturer of "TUFF" Silicon Manganese
Brand name "TUFF" under the City Cat Overseas Chemicals Ltd.

Premium Product; Premium Manufacturer.

Vision

- At the heart of City Cat philosophy is our strong, values-based culture that focuses less on what we do, and more on how we do it.
- It is no surprise then that our City Cat vision and values are incredibly important to every one of us.
- Vision To be the market leader in project delivery, achieving sustain through the quality of our people and the strength of our relationship.

Mission

- We foster an entrepreneurial spirit throughout our businesses and value the ability to foresee business opportunities early in the cycle and act on them swiftly.
- Within brief time of its existence the company has emerged as a key player in the field.
- We are constantly focused on achieving better productivity through a culture of best practice benchmarking.
- We are a client committed organization and always strive to optimize client's satisfaction level at every cost.
- We intend to make TUFF brand name for quality and commitment.

Values

- Commitment to excellence
- Commitment and competence of the people
- Customer satisfaction
- Teamwork
- Constant improvement

TUFF

Silicon Manganese (SiMn)
Premium Product of
City Cat Overseas Chemicals Ltd (CCOCL)

We Follow:

- ★ Right Quality 
- ★ Right Packaging (Sea & Air worthy packing) 
- ★ Delivery as per Commitments 
- ★ Real Value for Money 

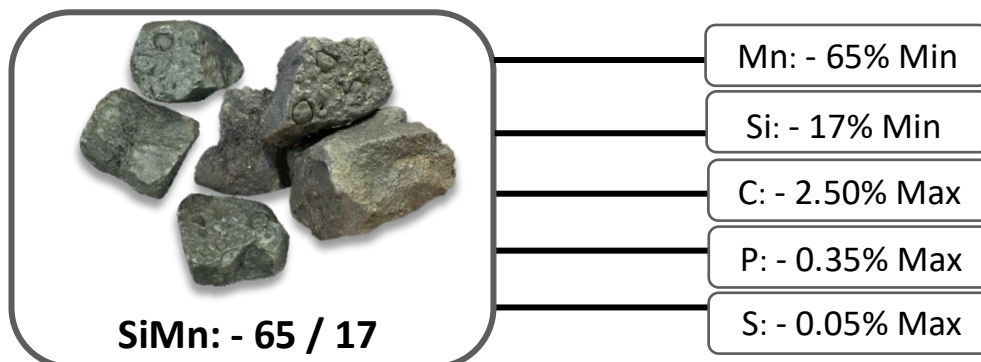

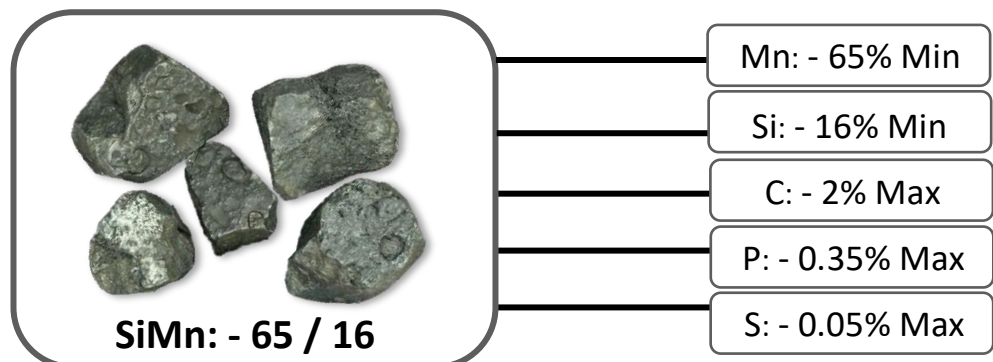

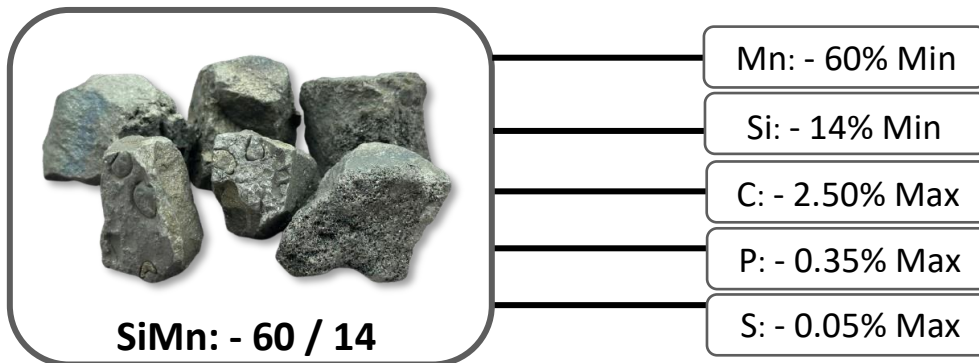

Export Office: - K.K. Chambers, 3RD Floor Office No 8, PT Road, Fort, Mumbai – 400001, India.

Silico Manganese [SiMn] Product

Silico manganese is an alloy of Iron, Silicon & Manganese. It is a cost-effective blend of manganese and silicon and is normally the product of choice for steel manufacturers. Silicon reduces the solubility of carbon in manganese alloys, so carbon contents are inversely proportional to silicon content. It is a more potent deoxidizer of steel compared to Ferro manganese.

Chemical Composition of Silico Manganese [SiMn]

Packaging

High Density Polyethylene (HDPE) also known as Jumbo Bags. High Density Polyethylene makes HDPE more durable and more resistant to punctures or tears, HDPE is commonly used for heavy-duty packaging for bulk or blunt-edged product or to make opaque plastic containers.

Size Of Bags are:

- 1 Metric Ton Jumbo Bags
- 50 Kg Bags
- 40 Kg Bags

**“TUFF” Silico Manganese
ISO Certified Company
CIN NO US1900MH1998PLC115352**

“serving since 1993”

“every step in Ferro Silicon Manganese”
